1 - NRA allocation is not included in total TAC

2 - 1996 TACs represent "threshold levels" above which "temporary" access is provided

3 - 2002 increase because NAFO quota in 2001 for SFA 1 was not taken. NAFO quota was increased from 65,000 to 85,000 in 2001 and Canada takes 17% of the offshore portion (5/6).

4 - In SFA 3, a catch limit of 3,800 t was in place from 2000 to 2002 pending further scientific assessment of the resource in this area. The official quota was set at 1,200 t. For SFAs 2 to 6 the season is Apr.1 to Mar.31; for SFAs 0, 1 and 7 the season is Jan 1 to Dec. 31.

5 - Includes 7,492t increase in 3L.

6 - The quota of 400t is for bycatch of *P. borealis* while directing *P. montagui*.

7 - Prior to 2007, this was a scientific quota

8 - In SFA 1, individual quotas remain the same with the caveat that once TAC reached, fishery is closed.
